finio

Start with Easy finance

A unified fintech experience for managing transactions, cards, and financial insights

PROBLEMS

Introduction

Design Thinking

Prototypes

PROBLEMS

faced by the users

- Existing apps feel cluttered or overly complex

- Users struggle to manage multiple financial services in one place

- ELack of clear insights into spending and investments

PROBLEMS

faced by the users

- Hard to find statements
- Unable to track monthy spendings
- Lack of invoice and reciepts

The Solution?

This app I just designed makes managing money a little less confusing and a little more manageable.

Introducing finio

A clean, structured interface for financial management!

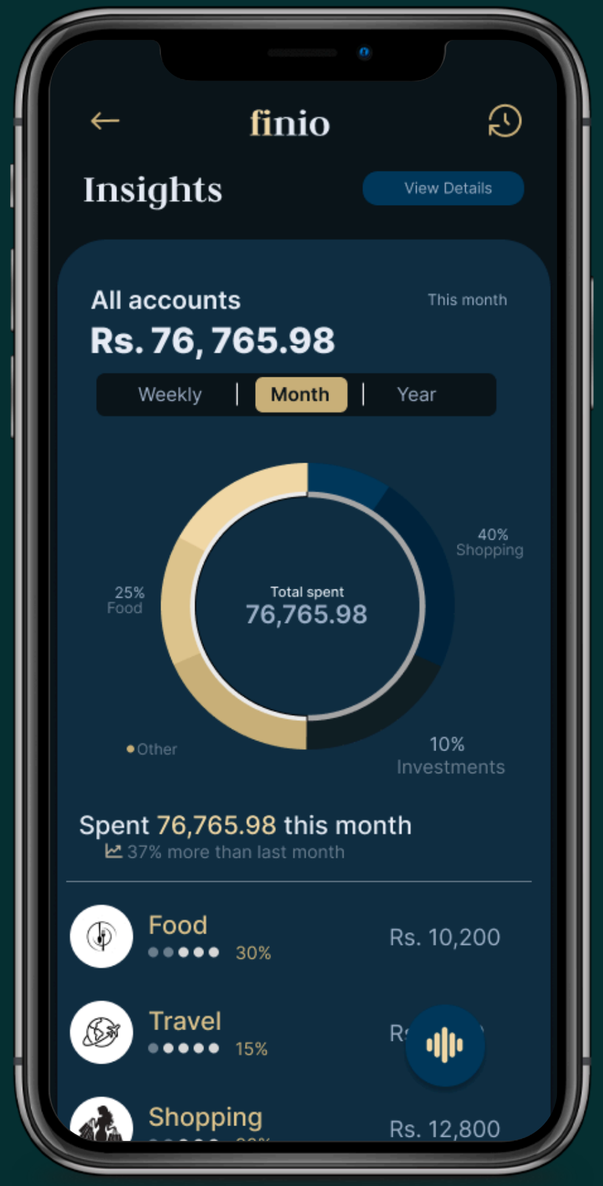
- Designed to make financial management feel simple and straightforward
- Users can quickly access important actions without searching or overthinking
- A clear layout helps users understand their finances at a glance

Visual insights to help users make informed decisions



SEE YOUR MONEY, CLEARLY

Break down your expenses with intuitive visuals and actionable insights.
Stay in control, optimize your spending, and plan smarter for the future.

EASY NAVIGATION FOR THE PAYMENTS

- Everything is organized so users don’t have to scroll endlessly trying to make sense of it
- Filters and search make finding transactions quick and painless
- Spending and income are clearly highlighted , no guessing required

DESIGN GOALS

SIMPLE UI

Finance is already stressful, anyone would like a UI that isn’t.

CLEAR IDEA

Users should feel like they’re managing their money.

CONSISTENT DESIGN

Same patterns everywhere so users don’t feel lost.

CLEARLY HANDLED

Users shouldn’t have to “figure things out” like it’s a puzzle.

DESIGN SYSTEM

BECASUE...

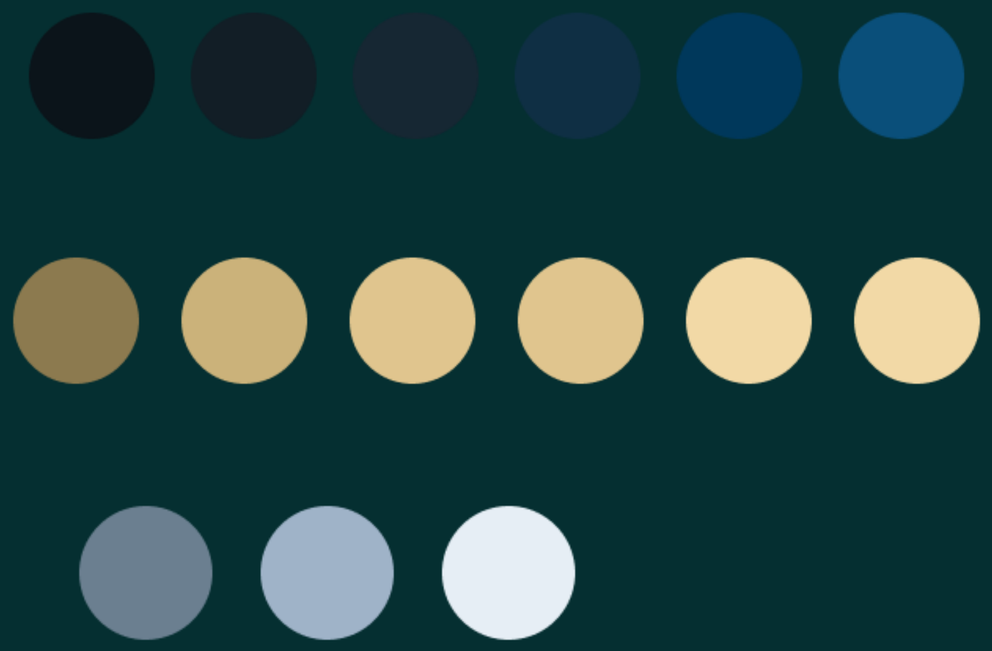
IT’S AESTHETIC

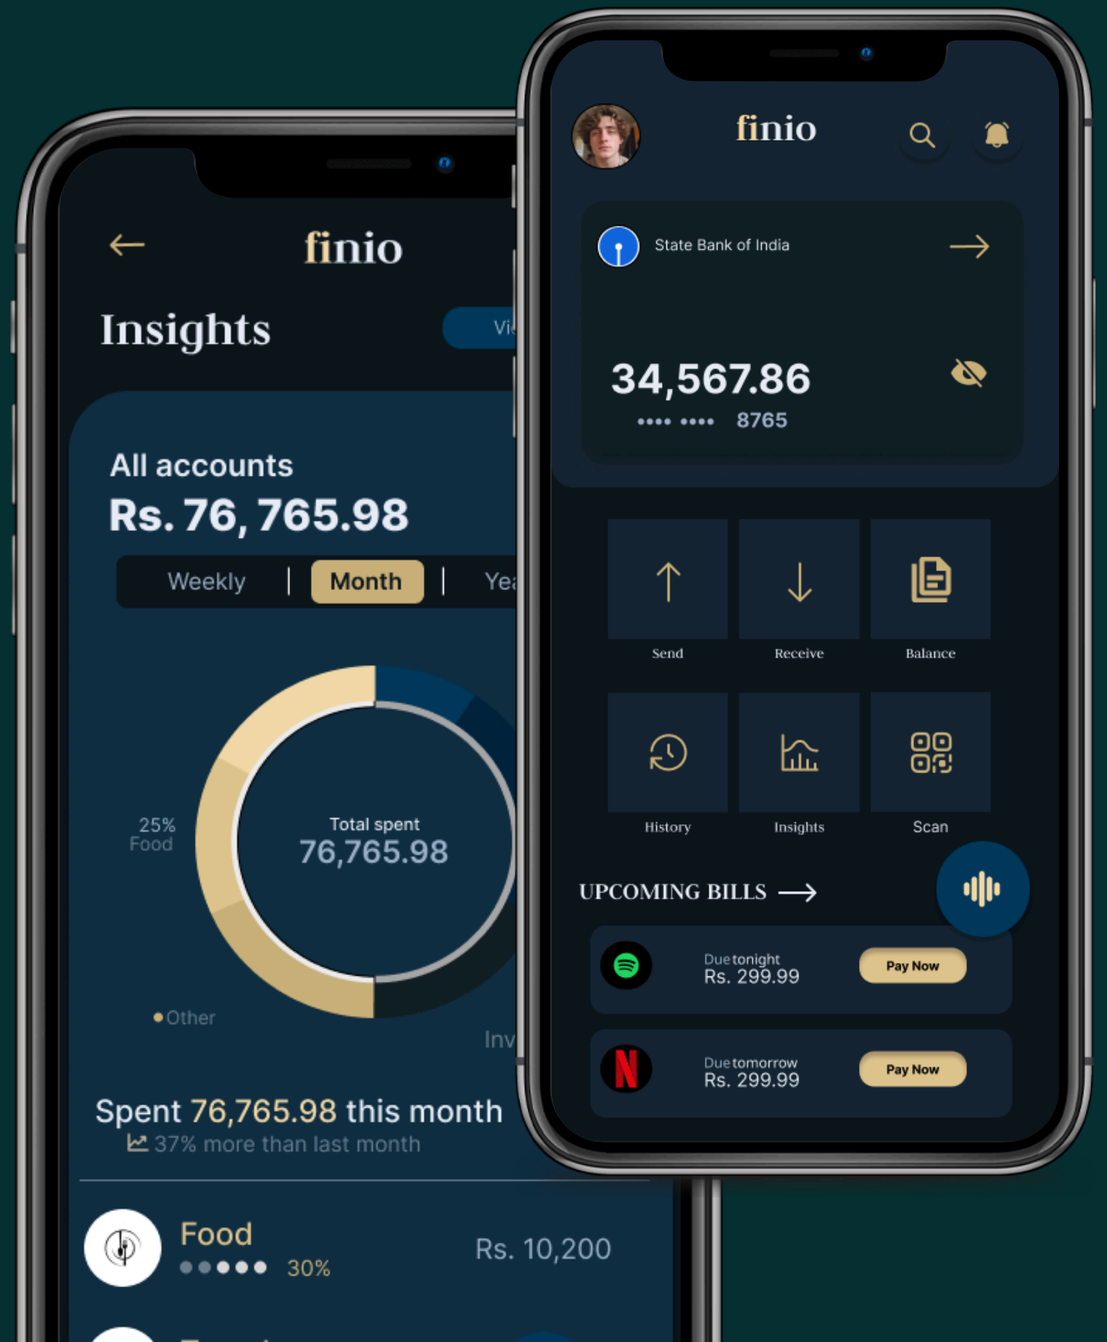
anyway....I’ll explain ->

DESIGN SYSTEM

- Dark theme reduces visual strain and keeps focus on content

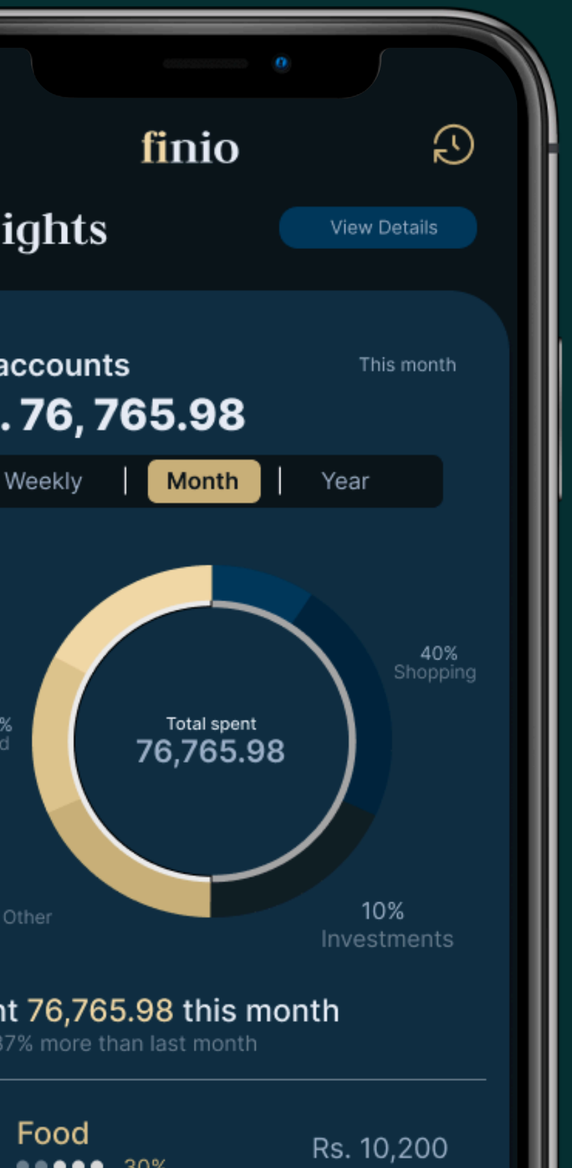
- Teal + Slight gold makes the app look attractive and draws attention

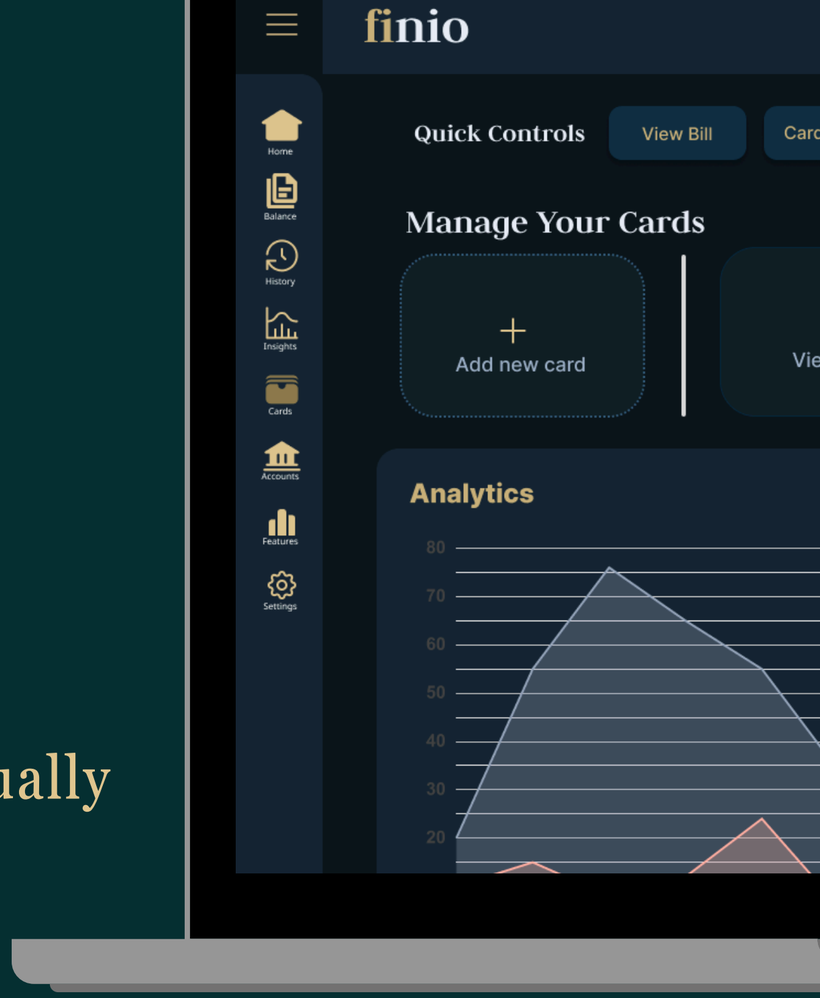




Teal provides a calm and trustworthy base

Gold highlights guide attention to important actions





Together the two colors not only look visually appealing

But they also provide a premium and trustworthy feel

TYPOGRAPHY...

...INTER

Inter was used for body text and UI elements due to its high readability and clean, modern structure, making it ideal for digital interfaces.

...TYPOGRAPHY

JUDSON...

Judson was used for headings to introduce contrast and add a subtle sense of elegance and personality to the interface.

TYPOGRAPHY

The combination balances functionality (Inter) with visual character (Judson)

I also used a pairing of sans-serif + serif pairing to create hierarchy and visual contrast without relying heavily on color or size

A sneak peek at the desktop designs

ACCESS YOUR FINANCE AND YOUR CARDS ANYTIME, ACROSS ALL DEVICES

- ACCESS YOUR CARDS ACROSS ALL DEVICES
- VIEW ALL CARDS IN ONE PLACE
- REAL-TIME TRANSACTION TRACKING
- INSTANTLY LOCK OR BLOCK CARDS

YOUR FINANCIAL OVERVIEW, SIMPLIFIED

- Unified view of all financial activities
- Smart insights through visual analytics
- Real-time tracking of goals and spending
- Timely updates for better decision-making
